

## Waterfront Report Annual 9/3, 2011

The waterfront now has the new cribbing and new docks. We now have two more slips, so I have renumbered them. Slip number 4 is the loading slip. Slip number 5 is a two week slip. We thank Paul Ellis for organizing the waterfront repair. M&H did the cribbing. A-One Builders made the docks. We thank Gary Wadsworth for hooking up the electricity. We now have power on both sides of the harbor.

Paul has set up the horseshoe pits.

We had the raft drift into the harbor breaking the swim lines in June. These have been repaired by Burgess construction.

We have had some trees drift into the harbor and on the shore from Tropical Storm Irene. Most boats were removed. I called those with canoes and kayaks that were not tied down. I have also called Chester Wincowski, who has water in his boat, and left him a message.

We are checking on having the silt that has drifted in removed. The water at some of the slips was very low this summer.

When the racks were filled, I had one request to put another kayak in.

Some of the boats were not in the water as they were being repaired. We seem to have been able to accommodate everyone this year. The Waterfront Committee is going to assign the slips in January as before. We are also going to be assigning the spaces on the canoe and kayak racks. The forms are sent out with the dues notice.

I ask that you cross your name(s) off the list when you remove your vessel and call me. That way I will know when space is available.

For those few whose lots do not have full waterfront rights the rights are \$1,300 2011 to may 2014. The cost for waterfront rights for a lot with no rights is \$8,500 for the same period of time.

Mary-Ellen Moroney, Harbormaster
